CASTINGS & WHEELS

A TRUSTED SUPPLIER OF CAST METAL PRODUCTS FOR OVER 85 YEARS

At Reliance Foundry, we have produced and supplied industrial wheels and metal castings since our company was first incorporated. Since the beginning, we have been committed to providing top-quality cast metal products and to doing whatever it takes to ensure our customer's satisfaction. 85 years has taught us what it takes to produce high quality custom castings and cast metal wheels that will ensure your heavy-load transfer carts will remain productive. Today, we operate as a supplier foundry and we remain committed to providing cast metal products that deliver unmatched dependability. We put our knowledge into the design of custom castings and durable, long-lasting wheels and we have used our experience to develop quality process standards that ensure the quality that you expect. We'll always take the extra step to ensure that our wheels and custom castings meet the exact specifications of your project and testaments to the success of our cast metal products can be found across the globe. We can help to ensure that you are seamlessly supplied with industrial cart wheels and we'll see your high-volume custom casting project through from concept to delivery.

CASTINGS

At Reliance Foundry, we're always available to facilitate the production of your high volume steel and iron casting projects. Operating as a supplier foundry, we serve both large and small business and original equipment manufacturers. We source material from across the globe and manage production in many common ferrous alloys. We cast metal with meticulous attention to detail and we can offer machine finishing as a value-added service. With over 85 years of experience in the foundry industry, the benefits of our casting processes can be summed in four words - accuracy, versatility, integrity and finish. Trust Reliance Foundry to see your casting project through from design to delivery.

Steel Castings

Get straightforward advice from experienced foundry professionals and achieve unsurpassed uniformity in your casting project.

Iron Castings

Experience versatility that allows the casting of almost any design, from ½ lb. to 4,000 lbs.

Stainless Castings

Have castings created to your exact specifications with our value-added services that include specialized machining and coating.

WHEELS

At Reliance Foundry, we understand that you depend on your kiln and heavy-load transfer carts day in and day out and that is why creating durable, long-lasting wheels is our top priority. We employ quality process standards during production to create steel wheels that exceed industry norms and deliver the strength, durability and performance you expect. We offer an extensive catalogue of both single and double flanged wheels that are kept in stock, and we work to ensure that our customers are seamlessly supplied. Complimentary custom machining, bushing and coating options are available and we'll always take the extra step to ensure that your steel wheels meet your exact specifications.

Single Flanged Wheels

Rely on the superior endurance of steel wheels that offer high-calibre tensile strength.

Double Flanged Wheels

Trust in the proven performance of our cast alloy wheels that are designed to deliver an unmatched performance.

Custom Wheels

Have industrial wheels created that are optimized to the exact demands of your application with our expert design team.

WHAT ARE THE BENEFITS OF SOURCING YOUR HIGH-VOLUME CASTING PRODUCTION WITH RELIANCE FOUNDRY?

1. Expert Advice

Our experienced foundry professionals can suggest the appropriate manufacturer and technology for production of your cast metal components. With over 85 years of casting experience and our background in sourcing quality production facilities, we have the technical insight to determine the most economical and efficient production of your castings.

2. Quality Process Standards

Our foundry experts verify the quality and consistency of all component specifications so you can be confident that your materials were produced to required specifications. Outsourced production facilities are routinely inspected for quality and all manufactured components are inspected by foundry professionals before leaving our warehouse.

3. Less work

Sourcing your castings through Reliance Foundry will help you avoid the head-aches of administrative, transportation and customs issues. All communications, regulations, ocean freight, duties and the myriad of details associated with international sourcing are taken care of by our experienced staff, at Reliance Foundry.

COMPANY OVERVIEW

At Reliance Foundry, a commitment to innovation has allowed us to adapt to the changing needs of our customers for over 85 years. With a catalogue that currently features bollards, bike racks, industrial wheels and custom steel and iron castings, this commitment has allowed us to grow from limited manufacturer to global supplier.

Reliance Foundry's storied history began in 1927 and today we remain committed to delivering the products that meet the evolving needs of contemporary businesses and communities. We search the globe to source the most innovative and economical metal solutions. As our product offering continues to grow, we're quickly becoming your all in one source for decorative and functional bollards, site furnishings and castings.

With the support of foundry professionals and industry-leading online resources, we're available to guide you through your bollard, bike parking, industrial wheel or custom casting project from the design to the delivery stage. At Reliance Foundry, we strive to provide the highest level of product support and customer service. Contact us today to see how we can help!

SUSTAINABILITY

Sustainability is a core business value at Reliance Foundry and we've made producing environmentally-friendly products a top priority. Wherever possible, our bollards, bike stands, castings and wheels are created from recycled material and almost every product in our catalogue is fully recyclable. We design our products to provide exceptionally long service lives and we continue to seek out new ways to lessen their environmental impact. At Reliance Foundry, we recognize that supporting "green" initiatives and environmentally-friendly practices contributes to the success of both our business and yours.
