

Detectable Warning Plate R-4985-30

General Description:

Reliance Foundry's R-4985-30 detectable warning plates were created to facilitate inclusive public spaces by making high-traffic areas safer and more accessible to those living with visual impairments. Compliant to both CSA B651-12 and ASTM 1028 tactile paving standards, these cast-iron plates effectively signal changes in level or a transition from sidewalk to street while preventing slipping with use of grid textures and truncated domes. Easily installed by setting in concrete, these plates are engineered to withstand being ran over by heavy vehicles and are fully recyclable at the end of their life cycle.
