

DECORATIVE PLASTIC BOLLARD COVER COLOR OPTIONS

Models: R-7171, R-7172, R-7173, R-7173-L, R-7174, R-7175, R-7176

Decorative polyethylene plastic bollard covers are available in a range of colors for aesthetics and visibility. Polyethylene won't fade or chip from regular weathering, and is low-maintenance. Plastic bollard covers also resist physical markup from collisions, and chemical wear from solvents and de-icing salts.

ABOUT LDPE POLYETHYLENE

Each decorative plastic post cover is made from low-density polyethylene (LDPE) plastic in which the selected color is impregnated. Ultraviolet and antistatic additives prevent fading due to sun exposure, producing a bright, resilient color. The color extends through the entire material area of the cover, so subsequent dents and scratches have a minimal effect on the overall appearance.

COLOR OPTIONS:

Reliance Foundry offers ten different color options for its line of decorative plastic bollard covers.
